

Notice and Consent for Early Intervention Initial Screening

Student: Jesse's Demo
School District: Demo District
Parents: Jesse LaVere

Date of Birth: 12/10/2009
School Building: Demo Agency
Date of Referral: Jul 10, 2013 12:00:00 AM

Demo District proposes to conduct an initial screening of your child to determine whether s/he is suspected of having a disability and is in need of a multidisciplinary evaluation. The screening will include:

- Gathering information on your child through parent/caregiver interview(s)
- Observations of your child
- Use of a screening instrument by trained personnel
- Review of other available information (such as medical records)

The district proposes to conduct screening procedures with your child because:
this is a test

The time required to complete the screening and subsequent multidisciplinary evaluation, if necessary to determine your child has a disability, is 45 calendar days from the time the referral was received by the Early Development Network. If exceptional family circumstances exist, the screening and multidisciplinary evaluation process may be delayed.

As a parent, you have the right to:

- Request a multidisciplinary evaluation before the screening process begins or at any time during the screening process.
- Request a multidisciplinary evaluation even if the screening results determine that your child is not suspected of having a disability.
- A written summary of the results of the screening

Parents of children with a suspected disability have protection under the procedural safeguards of the Individuals with Disabilities Education Act (IDEA). A copy of these "[Parental Rights in Special Education](#)," as well as, a copy of Rule 51, and Rule 55, which is the procedure for filing complaints and requests for due process hearings is provided with this notice.

If at any time you want to request an evaluation, or if you have questions regarding your rights, you may contact sdfd at _____.
