

Overview of Changes to the SRS Edit Student Screen

As part of our goal to update and modernize the SRS website, we have updated the Edit Student screen using the new Zend Framework web technology. This new version of the Edit Student screen will be very similar to the previous version, with a few notable differences. Those differences will be listed below.

#1. “Date Notified” is now optional

The original “Date Notified” text box goes back to the early days of SRS when a separate form had to be completed by the student’s parents before their son or daughters information could be added to the SRS website. It is no longer necessary to notify parents in the manner, so that text box was considered unnecessary.

#2. Entering a duplicate NSSRS ID Number will now show you where the duplicate record is located

The screenshot shows a form with a label "NSSRS ID#" and an input field. Below the input field, a red message box contains the following text: "• NSSRS ID# 1234567890 is already in use by another student at the following school: **Name** Tom Jones **County** zDemo **District** Demo District **School** Earth Elementary). You may want to consider requesting this record from the district above and then using the SRS student merge feature to combine the records".

When you enter a duplicate NSSRS ID# into the system, you will receive information on the name, County, District, and School where the duplicate record is held. This will provide you with the information you need to request a transfer for the duplicate record. Once both records are located in your district, you can merge them into a single record.

#3. Updates to the “Status” Menu

The Status Menu now has the following for options.

- Active
- Inactive
- Never Qualified
- Equitable Service

We have replaced the “Transferred to non-srs district” status and the “No longer qualifies” status with a new status that simply says “Inactive”. This option should be used whenever a student has exited from Special Education Services. Selecting this option will immediately trigger the Exit Reason and Exit Date text boxes to appear directly below.

Status*	Inactive
Exit Reason*	Three to 21
Exit Date	

#4. “Home School” was added to the Non-Public School Menu.

If you indicate that the student is a non-public school student you will instantly be given the options to select whether or not the student is considered a “Parental Placement” and to indicate the name and county of the non-public school where the student will be attending. “Home School” will be an option at the top of the “Non-Public County” menu.

Non Public County	Choose a county...
Non Public District	Choose a county...
Non Public School	Home School
	ADAMS
	ANTELOPE

#5. “Ward of the State” options will now be hidden until they are required.

The follow up questions for when a student is considered a ward of the state will only appear after you have selected “Yes” in the Ward of the State section.

#6. “Alternate Assessment” Status will now be set by the most recent finalize IEP Form.

The section labeled “Assessment” on page 7 of the most recent finalized will be used to automatically set
